Keystone Adapters & Blanks

DESCRIPTION

FABNET These angled adaptors have been designed for use in standard "Euro" 25 x 50 or LJ6C faceplates which easily connect into industry standard trunking, wall or floor box installations. It fits into a standard keystone wall plate and provides a modular connection point for various types of cables, including Cat6, Cat6A, or fiber optic.

APPLICATIONS

- Holder for Keystone jacks in face plate or floor boxes.
- Flat and angled styles
- Capable of providing RJ45/ RJ11 type connectors for accepting most of the computer requirements
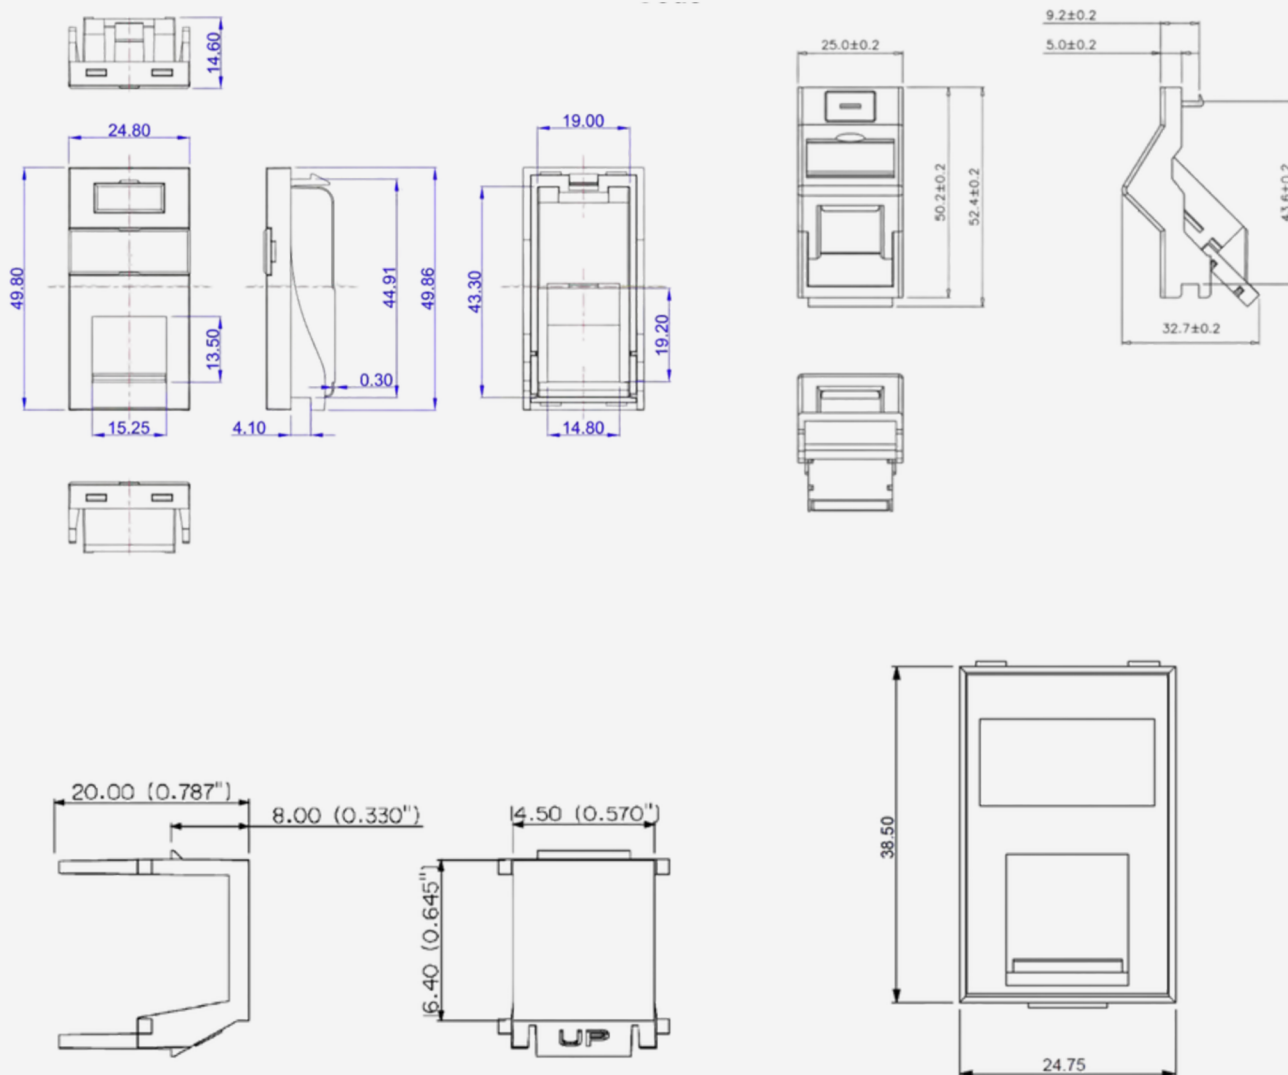

SPECIFICATIONS & FEATURES

- Fits standard 86 x 86mm UK back boxes and floor boxes
- Angled ports for reduced cable stress
- Blanking modules and Bezels to suit
- Blanking fit into faceplates and Patch Panels
- Available in white and black, for a variety of standard and decorative faceplates
- Convenient for quick installation
- UL verified
