

FLOOR STANDING STANDARD SERVER CABINETS

DESCRIPTION

FABNET Server cabinets also known as server racks or enclosures, are essential for organizing and protecting servers and other network equipment in data centers or server rooms. Our floor-standing cabinets are designed for ease of use and allowing for flexible placement and minimal assembly. The Cabinets support a wide variety of equipment, including servers, storage, switches, routers, PDU's, UPSs, console port servers and KVM switches. This rack gives you the flexibility you need with easy installation. The frame can be made either in Steel or in Aluminium & the static load capacity rating can reach up to 1500 kg.

APPLICATIONS
